Workers’ Compensation Provider List

The following medical providers must be utilized in all non-emergency cases where it is reasonable for the initial assessment and treatment of injuries and illnesses suspected to be work-related. This list is subject to change.

**Note:** In all cases, if a life-threatening situation arises and there is doubt as to whether a condition is work-related or a personal medical crisis, access the emergency 911 system to get immediate help. Liability issues will be resolved at a later time.
